

### REMARKS

This Supplemental Amendment After Final is being submitted in response to the Advisory Action of November 6, 2003 and at the request of Supervisory Patent Examiner Amy Nelson and puts the claims in form for allowance as suggested by Supervisory Patent Examiner Amy Nelson on November 7, 2003.

The present application relates to inbred maize line X1139Y. Applicant has now added new claims 64-76 which have been agreed upon as allowable by Supervisory Patent Examiner Amy Nelson. Claims 5-8, 20, and 42-63 were previously canceled in the Amendment After Final filed on September 2, 2003, claims 5-8, 20, 33, and 42-62 were previously canceled in the Amendment After Final filed September 2, 2003 and claims 9-19 and 21-41 were previously canceled in the Amendment of March 26, 2003.

Applicant would like to reiterate that the actual ATCC deposit will be delayed until receipt of notice that the application is otherwise in condition for allowance. As provided in 37 C.F.R. §§ 1.801-1.809, Applicant wishes to reiterate they will refrain from deposit of hybrid maize plant X1139Y and the inbred parents GE565937 and GE502199 until allowable subject matter is indicated. Once such notice is received, an ATCC deposit will be made, and the specification will be amended to contain the accession number of the deposit, the date of the deposit, description of the deposited biological materials sufficient to specifically identify and to permit examination and the name and address of the depository. The claims will also be amended to recite the proper ATCC deposit numbers. The Applicant provides assurance that:

- a) during the pendency of this application access to the invention will be afforded to the Commissioner upon request;
- b) all restrictions imposed by the depositor on the availability to the public of the deposited material will be irrevocably removed upon the granting of the patent;
- c) the deposit will be maintained in a public depository for a period of thirty years, or five years after the last request for the enforceable life of the patent, whichever is longer;
- d) a test of the viability of the biological material at the time of deposit will be conducted (see 37 C.F.R. § 1.807); and
- e) the deposit will be replaced if it should ever become inviable.

Therefore, Applicant submits at least 2500 seeds of hybrid maize plant X1139Y and the inbred parents GE565937 and GE502199 will be deposited with the ATCC.

Applicant respectfully submits all of the changes in this Supplemental Amendment After Final do not add new matter as there is support for the claims in the originally filed specification as stated in the Amendment After Final submitted on September 2, 2003.
